NPD to Participate in Radio Communication Drill

Niles, IL – On Tuesday, October 4, 2022, from 8 AM to 12 PM, the Niles Police Department will be participating in a multijurisdictional radio communication drill near the Golf Mill water tower at Cumberland Avenue and Church Street. During the drill, officers from numerous surrounding police agencies will be checking in at the drill site, participating in a brief radio communication exercise, then reporting to another drill site in Morton Grove. The repetition of this exercise will enhance communication skills with officers from other police departments in the event of a large-scale emergency where mutual aid is needed.

There will be no road closures and no disruption in police services during this drill. Residents can expect to see multiple police vehicles from multiple police departments driving through the area during this exercise.
