

## **WATER HEATER PERMIT CONDITIONS**

**\* A Completed Permit Application Shall be Submitted Along With All Items In Bold.**

- **Plumbing Contractors License submitted or must be on file with the village.**
- **Certified letter of intent as required by the State of Illinois.**
- All gas piping shall have an easily accessible full port gas valve tied in with a union and a drip leg.
- A full port (3/4" valve) must be located on the cold water side. No valves are allowed on the hot water side.
- A water heater must be tied in with unions. If dissimilar metals use dielectric unions or fittings.
- All soldering must be done with a lead free solder.
- A relief valve pipe of metallic tube shall be of full size (3/4") and extend to 6" inches above floor, and discharge to a suitable drain.
- All flue pipe shall have three screws at each joint. The draft diverter shall also be screwed down. The contractor shall certify that the existing flue or B-vent is in good condition.
- If water heater is located in a closet or other enclosed space, the space must be ventilated. There shall be 2 vents, 1 at the top and the other at the bottom, both shall be a minimum of 100 square inches each and a floor drain.
- All water heaters shall be installed in accordance with the Illinois State Plumbing Code, and per manufactures specifications. Clearances to combustible materials will be strictly enforced.
- If you have any questions regarding any of the above conditions, please contact the Building Department.
